GAF to provide consulting services for Water Resources Management Information System in Mozambique

GAF AG, based in Munich, together with its partner AHT, from Essen, has been awarded the contract for developing the National Integrated Water Resources Management Information System (NIWRMIS) in Mozambique.

Munich, 12 June 2018

The consulting services include a diagnosis of existing systems, user requirements consolidation for the NIWRMIS, the design and implementation of the NIWRMIS, including the data and hardware configuration, the capture, validation and migration of data to NIWRMIS, the integration of a decision support system and also institutional strengthening and know-how transfer measures.

GAF is proud to provide experienced and competent experts for this challenging project. The project team combines skills in IT and systems (system and software engineering, programming, GIS and databases) together with thematic expertise in domains such as hydrology, water quality and modelling. The project duration is 2 years plus a 1-year maintenance phase, and the total volume amounts to 1.1 million Euro. The project activities are scheduled to start in Maputo in June 2018.

Matthias Schulz - head of GAF software development and project director comments: "Information systems are not a job for just IT experts: we mobilise our combined experience in IT and geo-information, in resource management and modelling as well as in business process design and capacity building. The contract award for NIWRMIS follows a number of successful projects in Europe, Africa and Asia where GAF has set-up best-in-class, nationwide geoinformation systems."

The contract has been awarded by the Government of Mozambique and the work will be performed for the National Directorate of Water Resources Management (DNGRB) as part of the National Water Resources Development Project (NWRDP). The project is funded by the Strategic Climate Fund managed by the World Bank.

About GAF AG – Germany

GAF AG is an e-GEOS (Telespazio/ASI) company located in Munich and Neustrelitz, Germany. It is a leading solutions-provider with an international reputation as a skilled supplier of data, products and services in the fields of geo-information, satellite remote sensing, spatial IT and consulting for private and public clients. GAF offers solutions in the sectors of mining and geology, natural resources, water and environment, security, land, agriculture, forestry and climate change. Since 1985, the company has been active in more than 1000 projects worldwide. For more information, please visit www.gaf.de.
